

ASX ANNOUNCEMENT

23 September 2011

No. of Pages: 1

FY11 PRELIMINARY RESULTS

Cougar Metals NL (ASX Code: **CGM**) is pleased to advise that **preliminary** results for the year ended 30 June 2011 reflect the Company having generated an operating profit before tax in the order of \$4.1 million on sales of approximately \$22 million.

The Company's accounts are in the process of being finalised and the audit is still in progress. Accordingly, the results may be subject to change.

Per Randal Swick (Managing Director) *"the financial year ended 30 June 2011 has seen a strong operating performance across both the drilling services and gold businesses. In particular the expansion of the drilling services business through the creation of a new company in Uruguay has been very positive as has been the commencement of trial mining at the Ze Vermelho Prospect within the Company's flagship Alta Floresta Gold Project in Brazil."*

Included in the preliminary results is approximately \$2.5 million in gold sales, resulting from the gravity processing of ore at Ze Vermelho from January 2011. At 30 June 2011, approximately 2,000 tonnes of high grade tailings from the gravity plant had been stockpiled and the Company is in the process of construction of a cyanide treatment circuit which will process these tailings and all tailings from ongoing trial mining.

Per Randal Swick *"whilst the mining activity and subsequent processing of material at Ze Vermelho is an exploration exercise to define and quantify the nature of the known mineralised structure, the Company has and continues to generate strong returns from the processing of the ore. Since year end and up to the date of this letter, the Company has banked approximately USD1.48 million in gold sales from the gravity treatment of the ore,"*

The Company expects to finalise its results in the next few days ahead of the statutory reporting deadline of 30 September 2011.
